

Myo 200

The Myo 200, for electrotherapy, myofeedback and combination therapy

The Myo 200 feedback device is very user friendly: once the goals and the intensity are established, the operator is ready to start the treatment within the personalized parameters of the patient. The unique Myo software program further increases the Myo's possibilities: storing results, displaying and printing different charts, keeping patient files up to date. The Contilife™ test is included.

Its versatility and functionality makes the unit very suitable for many kinds of exercises and relaxation therapies, including pelvic floor treatment.
